

Warranty Information & Registration

We deal with several manufacturers of quartz and the free extended warranty sign up is different for all of them. We have listed below each specific supplier and what is required to obtain this warranty. Usually this must be completed within 30 days of installation.

The length of the warranty cover is different with each supplier so please read all the available information for your chosen manufacturer. In particular **please read the warranty information including the terms and conditions** that will explain what is and what is not covered.

With Granite, as it's a natural product, there is no extended warranty other than coverage by the Consumer Rights Act
