About CRL Stone.

CRL Stone has developed a comprehensive range of beautiful, engineered quartz surfaces, created to meet the demands of modern living. Hard wearing and easy to care for, CRL Quartz is ideal for the kitchen and bathroom where durability and flexible design are paramount.

CRL Quartz is scratch, heat and stain resistant. Unlike natural materials such as marble, CRL Quartz never needs to be sealed. Requiring minimum maintenance to keep it looking as good as new, the non-porous surface makes cleaning simple, with soap and water or a mild detergent is all that is needed.

ARABESCATO VAGLI - QZ172

CRL | STONE

Offering a versatile design solution appropriate for any setting, CRL Quartz is available in a choice of over 40 colours. In thicknesses of 20 mm and 30 mm, the surface comes in an extra-large format slab, allowing for greater consistency in design over large spaces such as kitchen worktops.

CRL Quartz comes with a 25 year residential warranty and 10 year commercial warranty for added peace of mind.

Visit crlstone.co.uk to register your surface and activate your warranty.

Barletta.

QZ176

Infinitely elegant, CRL Quartz Barletta is a dreamy, light and luminous marble-inspired surface featuring neutral shades that swirl organically to bring an air of subtle sophistication to any space.

Layered upon a soft white canvas, the captivating beige and cream shades create a warm and welcoming aesthetic in classic and contemporary settings.

Team with brushed bronze or gold to accentuate the warm tones or introduce darker accents for contrast.

Messina Gold.

QZ170

Bringing a natural elegance to either a classic or contemporary setting, Messina Gold features fine veining on a crisp white background, to make a subtle design statement.

Working in harmony with any decor, from bold, bright colours to the earthy tones of raw timber and brushed metallics, Messina Gold beautifully complements even the busiest of multi-functional kitchens, creating a clean and airy feel.

Inspired by the beauty of marble, yet with hardwearing and durable properties, Messina Gold is a timeless staple for the modern home.

Kitchens.

Timeless Durability

CRL Quartz Surfaces are incredibly strong materials that easily withstand wear and tear and are practically maintenance free making them ideal for kitchen worktops. Available in 20 mm and 30 mm thicknesses, a range of styles from sleek and modern to traditional farmhouse kitchens can be achieved. With super jumbo slab sizes available in some of the range, even larger areas can be covered using just one slab, meaning kitchen islands can measure up to 3470 x 2010 mm without the need for joints.

Quartz is a non porous material that offers a hygienic solution for the kitchen environment with the additional benefits of also being scratch, heat and stain resistant.

Bathrooms.

Luxurious Elegance

For streamlined, hotel-inspired design in any bathroom add Quartz to the vanity top for a sense of opulence. CRL Quartz Surfaces create a luxurious look and can be complemented by on trend bathroom hardware for a relaxing, calm finish.

Bathroom vanities require a non porous material to resist moisture as well as being hygienic and easy to clean. CRL Quartz Surfaces have these properties and with so many finishes to choose from you're sure to find the perfect solution for your bathroom.

Commercial.

Enduring Style

Commercial spaces are often subject to high traffic and plenty of wear and tear, therefore as well as looking visually stunning they need to be able to withstand knocks and bumps as well as being easy to maintain.

CRL Quartz Surfaces are durable, hardwearing surfaces that are non porous and easy to clean making them suitable for commercial projects such as bar areas and reception desks.

Walls.

Statement Elegance

Feature walls have been an on-trend way of creating a visual statement for a while now, particularly in the open-plan living space. Now, with technology filling our homes and driving fashion, media walls have taken on the mantle.

The choice of surface material is crucial, with CRL Quartz Surfaces these walls not only add aesthetic appeal but also provide exceptional functionality. The colour or pattern chosen should complement the design of the rest of the room, particularly when the layout is open-plan so always visible. A bright and bold feature wall that stands out should also work in harmony with the rest of the room to ensure it is visually pleasing.

Backlighting Quartz

CRISTALLO PERLA QUARTZ - INSTALLED AT SCHMIDT ALTRINCHAM, FABRICATED BY GRANITE AND MARBLE SHOP

Quartz has long been the go-to surface for those seeking beauty, durability and practicality in equal measure. But for those looking to make a real design statement, backlighting quartz can take this versatile material to a whole new level.

A striking technique

At CRL Quartz, we're seeing growing interest in this striking technique, particularly in commercial environments and bespoke furniture design. By carefully reducing the thickness of certain quartz surfaces and combining them with specialist lighting, it's possible to create a dramatic, illuminated effect that showcases the natural depth and veining of the stone in a whole new light, quite literally.

One of our most striking examples to date is a bar installation using Cristallo Perla. When backlit and reduced to a 10–12mm thickness, this marble-inspired surface takes on a whole new character.

This kind of application highlights just how creative you can be with quartz, while the majority of quartz surfaces we supply are destined for use as worktops, backlighting opens up new design possibilities in retail, hospitality and high-end residential environments.

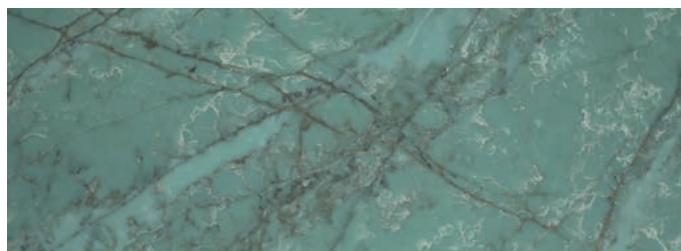

In the right setting, this design technique can become a focal point. Bars, hotel lobbies, retail displays and luxury washrooms are all perfect places to embrace backlit quartz. Whether used as a feature wall, bar front or countertop, it adds a sophisticated glow that instantly elevates the overall design.

Backlighting can be achieved with Cristallo Perla, Cristallo Verde, Cristallo Azure and Venetian Grande.

For more information on how to achieve a backlit effect please contact us at contact@crlstone.co.uk or call 01706 863 600.

Durability and Style. That Lasts a Lifetime.

CRL Quartz Stone surfaces are exceptionally durable, perfect for kitchens and bathrooms. They resist wear, scratches, stains, heat, and impact, ensuring long-lasting performance. Easy to clean and maintain, their non-porous design prevents bacteria and mould build-up. With a 25-year residential warranty and a 10-year commercial warranty, they offer both style and reliability for any space.

Resistant to Wear & Tear

Thanks to CRL Quartz surfaces technical characteristics, this is one of the most resistant surfaces on the market, ideal for use in the kitchen and bathroom.

Highly Scratch Resistant

Food can be cut directly on top of the surface without it being damaged. Even so, adapted cutting boards should be used for cutting.

Stain Resistant

CRL Quartz surfaces are not affected by products like solvents, detergents, bleach, oil, vinegar or citrus juice, provided that the stains are cleaned away within 24 hours.

Heat Resistant

It does not burn or give off smoke or toxic substances when exposed to high temperatures.

Impact Resistant

CRL Quartz has a high resistance to knocks and impacts.

Easy to Clean & Care For

No extra care or special products are needed to clean it. Spills can be removed with water or mild cleaning products.

25 Year Residential Warranty

Visit crlstone.co.uk to register your surface and activate your residential warranty.

Hygiene

Because it is a non-porous surface, the build-up of bacteria or mould is prevented, and food can be placed in direct contact with it.

10 Year Commercial Warranty

Visit crlstone.co.uk to register your surface and activate your commercial warranty.

Care & Maintenance.

Routine cleaning

CRL Quartz surfaces are virtually maintenance free and can be cleaned with extreme ease.

For routine cleaning and to wipe off spills, use a damp cloth or paper towel and a small amount of mild soap or non-acidic cleaner. Once clean, rinse and dry the surface thoroughly.

Note that colours available in a honed finish are more sensitive to grease or finger-prints than polished surfaces and may require extra care during routine cleaning due to the different level of smoothness.

Stain resistance

Thanks to their non-porous properties, Quartz surfaces are highly resistant to stains. However, do not allow dirt and residue such as stubborn food or gum stains to harden and remain on Quartz surfaces for extended periods of time. In case they do, scrape away gently using a small blade or putty remover before cleaning with warm water and soap.

For stubborn or dried spills, use a non-abrasive cleaning pad combined with a small amount of mild soap or specialised stone cleaner. To prevent hard water damage, wipe up spills immediately and consider using a water softener or distilled water for cleaning, especially in areas with hard water. If hard water stains occur, use a pH-neutral cleaner or a diluted solution of vinegar and water with a soft, non-abrasive cloth.

Scratch resistance

Quartz is one of the hardest materials in nature, which is an assurance that your CRL Quartz surface will not easily scratch or chip. However, avoid using sharp objects such as knives or screwdrivers directly on the surface.

The use of a cutting board is recommended.

Heat resistance

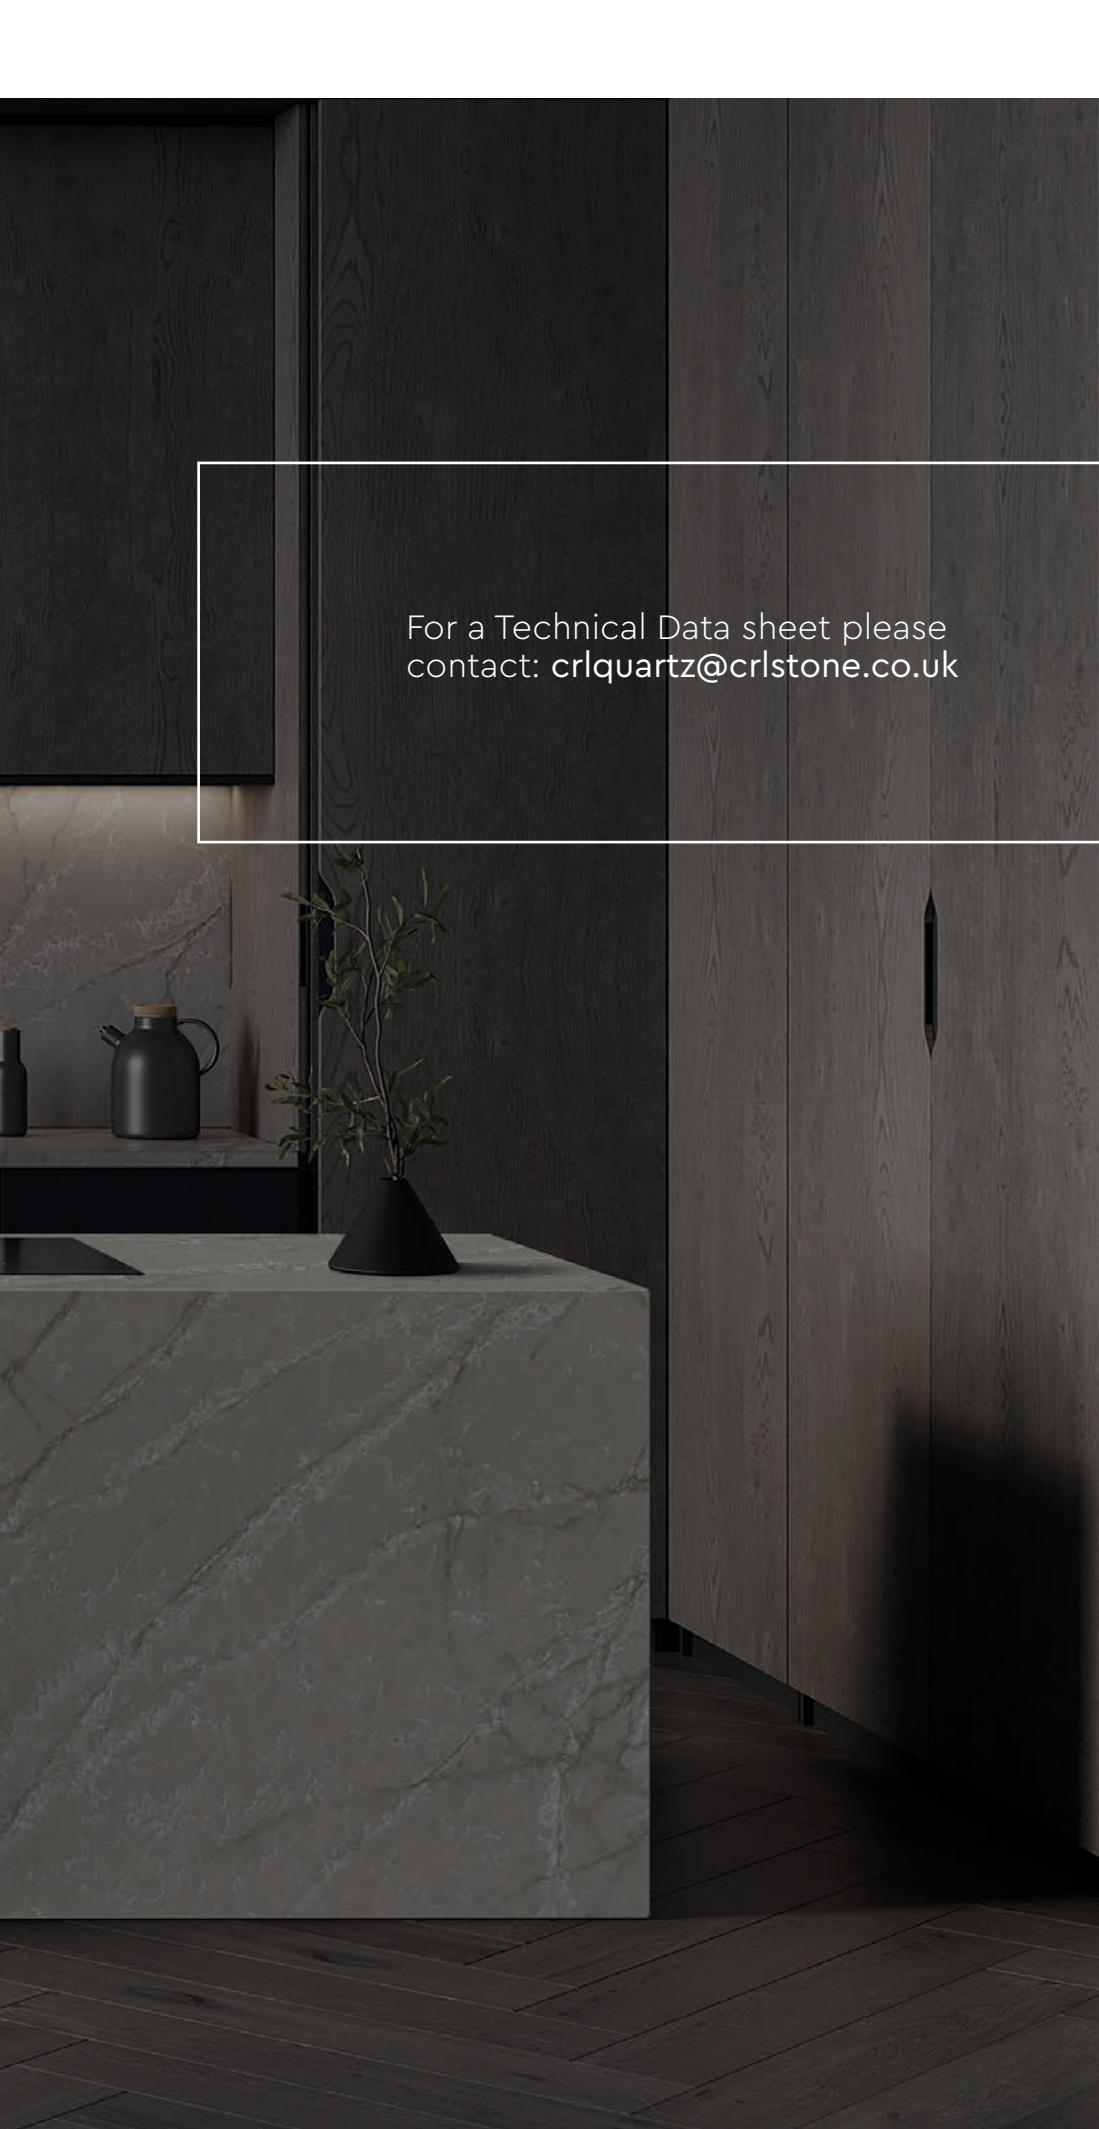

CRL Quartz surfaces can tolerate moderately hot temperatures for short periods of time. To maintain the natural beauty of the product, do not place hot skillets or roasting pans directly onto the surface but use an insulator or trivet instead.

Recommended stain remover

Bar Keepers Friend Power Cream

Avoid exposing CRL Quartz surfaces to chemicals and solvents, especially paint removers or furniture strippers containing trichlorethane or methylene chloride. Keep away nail polish remover, bleach or cleansers that contain bleach, bluing, permanent markers or inks. Strong abrasive and highly alkaline (outside of 5-9pH) cleansers are not recommended when cleaning CRL Quartz surfaces. Always follow the manufacturers' dilution instructions and recommendations.

If any of the substances listed above come into contact with your CRL Quartz surface, rinse the exposed surface immediately and thoroughly with plenty of clean water.

Low Silica and Silica Free.

Low silica and silica free surfaces are becoming more and more popular due to the fact that they address the health concerns related to silica dust exposure during the fabrication process.

CRL Stone is committed to the health and safety of its staff and industry colleagues and partners and in response has introduced a range of low silica and silica free surfaces, featuring some of our best-selling products. Just look out for the low silica or silica free symbols.

CRL Quartz low silica worktops contain less than 30% crystalline silica while providing the same great benefits as standard CRL Quartz.

Silica free surfaces from CRL Stone, are made using minerals & glass and offer the same great features as standard CRL Quartz.

Certified Excellence.

At CRL Stone, we take pride in offering surfaces that not only enhance the beauty of your space but also meet the highest standards of safety, quality, and environmental responsibility.

Our Quantra surfaces have earned multiple prestigious Certification that reflect our commitment to excellence.

These include NSF certification, which guarantees that our surfaces meet the rigorous public health standards required for direct food contact.

This makes them an ideal choice for kitchens and food preparation areas, ensuring your peace of mind when it comes to food safety.

Quantra is committed to the responsible usage of natural resources, always using the finest raw materials and sourcing them sensitively and responsibly.

The result is a highly durable and longlasting material. Quantra is certified by GREENGUARD and GREENGUARD GOLD as a low emitting product for indoor air quality and is suitable for all interior surfacing purposes.
